mPDF

Example 42. MPDFI templatedoc

```
<?php

include("../mpdf.php");

$mpdf=new mPDF('','','','',15,15,47,16,9,9);
$mpdf->SetImportUse();

$mpdf->SetDocTemplate('sample_logoheader2.pdf',1); // 1|0 to continue after end of document or not -
used on matching page numbers

//==================================================
$mpdf->AddPage();
$mpdf->WriteHTML('Hallo World');
$mpdf->AddPage();
$mpdf->WriteHTML('Hallo World');
$mpdf->AddPage();
$mpdf->WriteHTML('Hallo World');
//==================================================

$mpdf->RestartDocTemplate();

//==================================================
$mpdf->AddPage();
$mpdf->WriteHTML('Hallo World');
$mpdf->AddPage();
$mpdf->WriteHTML('Hallo World');
$mpdf->AddPage();
$mpdf->WriteHTML('Hallo World');
//==================================================

$mpdf->Output();

exit;

?>
```
